

## Harken Hydraulic Aluminium Winches

**BRIERLEY**  
HOSE AND HANDLING

Harken Radial Line winches have successfully balanced the need for a secure grip and line longevity with smooth, controlled easing while under load. Details sailors will appreciate: smaller winches that carry higher loads and stress-free seasonal maintenance.

Motors attach to central drive shaft and drive through winch gears for two-speed mechanical advantage.

Harken Performa winches combine the high-efficiency of the Radial line with the sandblasted grip of Harken carbon-fiber racing winches for powerful hybrids. Optimized to handle the high-strength line used on sportboats and performance cruisers, Performa winches are a great solution for crew who don't wish to invest in carbon winches or who need racing winches in smaller sizes.

Motors attach to central drive shaft and drive through winch gears for two-speed mechanical advantage.
