

LED Light

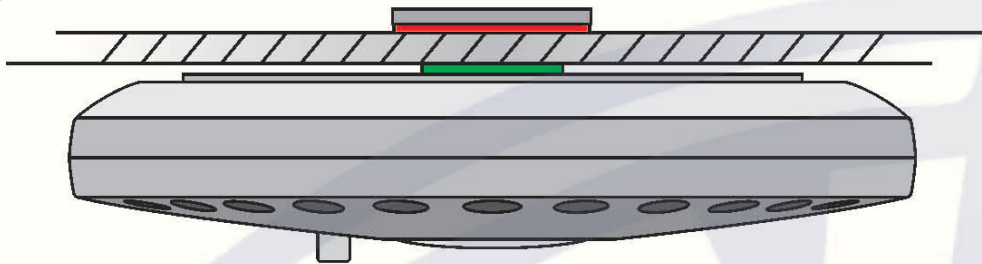

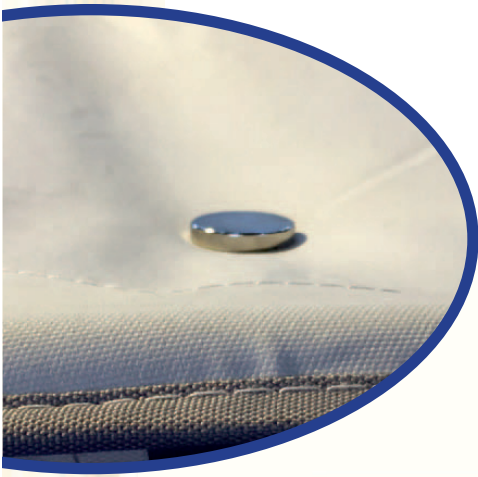

with innovative magnetic holder for fabrics

LED Light with magnetic holder for fabrics

Warm LED Light - exactly where you need it

No matter - whether on the sprayhood or bimini or any other awning fabric. Thanks to the new innovative magnetic holder, you will be able to bring light into the dark, exactly where you need it.

*Simple but
ingenious*

This patent-protected magnetic mounting idea finally replaces hazardous candle light, suspended torches and other awkward lighting appliances on board.

In addition to the magnetic holder the light can be used as a wall or ceiling light in the interior of the vessel (two integrated hangers)

Easy Mounting

thanks to the innovative magnetic mounting idea, the lamp can be installed quickly & simply on all awning fabrics.

Once attached it can be moved easily to the position where light is needed.

Warm LED

the warm LED's produce a bright and effective yet still pleasant light.

Easy to use

with the included remote control, the lamp can be operated from a distance. Depending on the situation, you can choose between two different light levels (3/23 LED's)

Flexible options

the new magnetic mounting idea can be used regardless of the yacht type or size. The battery powered light is independent to the on-board power supply and can be used away from the vessel as well (eg: camping, 4 x 4 or at home)

This product has been nominated in the category **Deck equipment, sails and rigging** by the jury for the DAME - Design Award 2016.

Specifications:

Dimension:	Ø 13cm x 2,5 cm
Illumination:	2 lighting levels (3/23 LEDs) <i>warm light</i>
Illumination time:	up to 100 hours
Power Supply:	4 x AA (1,5V) not included
Warranty:	1 year

Infrared Remote Control included (incl. battery CR2032)
