

## Slider Anchors

Slider anchors (also known as escape anchors) feature a full sliding ring along the shaft. The advantage of the full sliding action is that it is designed to allow you to drive over the top of your anchor, slide your chain over the shaft and pull your anchor out when caught. Our slider anchors are a unique design involving years of research and development to bring you a quality product with ultimate holding power, almost guaranteed retrieval and combined with a sleek design.

Featuring the unique Plough Style design you've known to love, giving you the great holding power of a traditional anchor with the added benefit of a Sliding ring. Available in both stainless steel and galvanised finish.

SKU		Weight	Boat Size	Height	Length
Galvanised	Stainless				
7062	7064	6kg	Up to 7m	274mm	592mm
7063	7065	7.5kg	Up to 9m	302mm	615mm
7077	7078	9kg	Up to 11m	340mm	692mm
7095	7094	16kg	Up to 14m	344mm	780mm
