

# Sprayflex 300 Chemical Hose

## Sprayflex 300 Chemical Hose

A premium hose designed for medium pressure weedicide, pesticide and general chemical transfer. Its distinctive inner blue tube is a PVC/Nitrile blend giving excellent resistance to most hydrocarbon solvents including aromatics, resulting in an extended life in the most demanding applications.

The black outer cover is also chemical resistant and resistant to ultraviolet light.

**Applications:** Transferring diluted weedicides, pesticides in general agricultural and horticultural applications. Also ideal for transferring a wide range of demanding chemicals in general industry.
