

STORMY

Inflatable PFD Technologies

The Stormy Thermal Life Jacket combines outstanding thermal insulation with our automatic life jacket. It offers 170N of buoyancy and hyperthermic protection all in one practical wet weather

jacket.

This jacket is water activated, has internal pockets and a lined hood rolled into the collar. The 38gm CO2 cylinder provides over 170 Newtons of buoyancy.

Stormy Inflatable Life Vests are suitable for most water activities. This is a comfortable life vest that's easy to wear and buoyant when you need it to be.

These vests are very practical for general boating conditions. The Stormy Vest 150N offers great

design with hand warmer pockets as an added feature. Stormy Vests are lightweight allowing great freedom of movement.

The inflation system can be both manually and water activated; you choose the best option for your boating activities.

The Life Vest Plus 180N fits over your clothing and secures with a waist belt. It is a multi-fit Personal Flotation Device. The utility pocket on the front chest is designed to stow safety extras.

The enclosed chamber provides protection once inflated, which is beneficial if you choose to orally inflate the jacket for peace of mind. The unique design is flat, comfortable and lightweight to wear. This life vest provides 180 Newtons of buoyancy. The inflation system is both manual and water activated. You choose what is best for your circumstances on or around the water.

The Stormy Life Vest Premium 180N fits over your clothing and secures with a waist belt and leg strap.

It is a multi-fit Personal Flotation Device with a strong outer cover that is comfortable and lightweight

to wear. It also features a back mesh cape panel and a removable fleece collar for comfort.
