

STORMY

Inflatable PFD Technologies

The Stormy Lite Vest 100N is designed for rock fishing, kayaking, general fishing and anyone on the water who requires a lightweight and practical life vest.

The vest features a mesh lining for enhanced comfort and breathability, whilst providing sun and wind protection. There are several pockets on the vest to provide storage space for food, fishing or safety equipment.

Stormy Life Vest Classic 150N with a waistbelt is the entry level Stormy Life Vest that does not compromise comfort, safety or ease of use.

The hard wearing nylon outer cover is sealed at the sides with velcro. This expands upon activation to reveal the yellow inflation bladder with oral inflation tube, complete with high visibility markings and a signal whistle attached.

This racer vest is constructed for powerboat and ski racers.

The hybrid buoyancy construction provides impact protection through the foam padding, while the inflation mechanism allows

freedom and comfort to have a non-bluky vest that inflates automatically in an overboard or crash situation.

The Stormy Wet Weather Thermal pants combines outstanding thermal insulation with a breathable-waterproof fabric, the same fabric which is also used in our Stormy Jackets and Vests.

The pants feature an elasticised waist, sealed seams, Hi-vis shin strip and a Velcro ankle strap for tightening to avoid water rushing.
