

STORMY

Inflatable PFD Technologies

The Stormy toddlers foam life jacket is accredited for all boating in Australian waters. This is an ISO approved foam PFD and is suitable for infants who are between 10-15 kilograms.

The robust materials, crotch strap, adjustable waist strap and grab handle make this the perfect life saving device for any toddler.

The Stormy Childrens foam life jacket is accredited for all boating in Australian waters. This is an ISO approved foam PFD. The robust materials, crotch strap, adjustable waist strap and grab handle make this the

perfect life saving device for any child.

It will always self-right so the child's head is always out of the water.

Available in the following sizes-

Child weight 20kg-30kg

Child weight 30kg-40kg

Child weight 40kg-60kg

The Stormy LifeSaver is a quick response life saving device that is designed to assist those who have fallen into the water without wearing a PFD.

The small, hard plastic casing provides convenient, all weather storage on deck or at a convenient location. It can easily be thrown 30 metres with accuracy to provide flotation as an inflatable life ring to assist rescue.

The Stormy Rescue Harness was designed in response to the need for a simple, easy to use, man overboard recovery system.

The simple design was intended to be easily operated by a single person.
